STUDY OF THE REDOX POTENTIAL IN THE WATERS IN THE BLACK SEA. [1961] [19]p. 31 ref's. Order from OTS or SLA $1.60 62-13088

Trans. of Gidrokhimicheskie Materialy (USSR) [1958] v. 27, p. 21-36.

DESCRIPTORS: *Sea water, Black Sea, Water, *Oxidation-reduction reactions, Potential theory.

A study of the distribution of the oxidation-reduction (redox) potential in the depths of the waters of the open portion of the Black Sea, using the electrometric method and, in part, the colorimetric method (with methylene blue), showed three zones with characteristic redox potential values. The upper zone, roughly the layer between 0 and 100 meters, has positive and rather stable values of the redox potential, from (Chemistry--Physical, TT, v. 7, no. 8) (over)

62-13088
